

LBL/BPC ANNOUNCEMENT

Syntha Pulvin in conjunction with its approved applicator network, are pleased to announce the extension of the warranties now offered by the Syntha Pulvin Brand.

The Syntha Pulvin Matt Warranty currently offered for 25 years will be extended to 30 years.

The Synthatec Premium Brand Warranty will be extended to 40 years.

Both of the warranties take immediate effect on all new contracts.

LBL and BPC are long established Syntha Pulvin applicators and as such have extensive historical data on buildings they have coated that already exceeds the warranties that are currently being offered.

Some examples of buildings which have out performed the 25 year guarantee period are:-

Millwall Docks Redevelopment

Morfa Athletics Stadium - Swansea

STC Telecommunications HQ - New Southgate, London

Rowbotham House, The Minories - London

Office Development, Tabernacle Street, London

LBL and BPC continue to offer only the highest standards for our customers and are fully committed to offering the best value and service in finishing for all our clients.

SYNTHA PULVIN – 30 YEARS PROTECTION GUARANTEED

Valspar's unrivalled Syntha Pulvin architectural metalwork powder coating now comes with a market-leading 30 year warranty guaranteed to beat any competitor.

The company extended the 25 year guarantee after learning its highly durable polymer coating is still protecting a major London building an incredible three decades after it was first applied.

The Wimpey Building was the first UK project undertaken by leading international coatings manufacturer Valspar in 1973.

When the work was completed, the coating was only guaranteed for 10 years. However, a recent full survey of the site revealed the baked-on powder is still preventing metalwork corrosion over 20 years after the initial warranty ran out.

Valspar's impressive range of Syntha Pulvin coloured coatings have added beauty, elegance and protection to thousands of projects since The Wimpey Building. And no claims have ever been made against the guarantee.

Mike Hanson, Valspar's Architectural Market Manager, said: "We are very proud to be protecting The Wimpey Building three decades on. With all the advances we have made with the product since it first launched, we are certain the current generation of Syntha Pulvin can easily last 30 years."

....More...

There are more than 100 products and colours available in the Syntha Pulvin Matt and Metallic ranges, and all are manufactured under carefully controlled conditions before being supplied only through approved applicators.

They are 100% recyclable and can be applied to aluminium and galvanised steel window frames, cladding panels, curtain walling, roofing and most architectural metalwork.

All products are fully weather resistant, prevent UV fade and offer thermal shock resistance. Syntha Pulvin Matt's durability has even been tested successfully for five years in the hot climate of Florida – equivalent to more than 30 years in Northern Europe.

The full range complies with BS6496, BS6497 and BS EN 12206-1, is BBA Certificated and conforms to Qualicoat Class 1 and GSB standards.

Notes to editors

Valspar Europe

In business since 1806, Valspar is the only major coating manufacturer in the world that focuses solely on coatings and inks, and is the world's largest coatings supplier to the metal packaging industry.

Valspar expanded into Europe in 1996 with the acquisitions of Coates Coatings and the Dexter Corporation in 1999. In 2001, Valspar acquired the Lilly Corporation to strengthen the company's Industrial Coatings division and took over H.B. Fuller's powder coating operations in 2006.

Today, with over 700 employees and five manufacturing sites across Europe, Valspar offers an extensive range of external and internal coatings, inks, UV varnishes, primers and polymers.

**TESTED TO EXTREMES –
THE POWDER COATING WITH A 40 YEAR GUARANTEE**

Sand blasting and seismic temperature shifts are no match for Synthatec Premium, the toughest powder coating in the world.

Successfully tested for more than a decade in the harsh, unforgiving climate of Dubai, Valspar's latest powder coating is now guaranteed to protect exterior metalwork in the UK for 40 years – whatever the weather.

Targeted at high end commercial and monumental buildings, the new line from top international coatings manufacturer Valspar – now available in the UK – is created to handle even the toughest weather conditions.

The ideal choice for architects and contractors looking to give their project extra protection from the elements, as well as create an elegant appearance, Synthatec Premium is produced to order and can be specified in any colour or finish to match any design.

Mike Hanson, Valspar's Architectural Market Manager, said: "If Synthatec Premium can survive in Dubai then we are extremely confident it can cope with any weather found in a temperate climate like the UK.

"It is a very high quality product that will keep exterior metalwork looking stunning, even after 40 years."

Synthatec Premium is manufactured under carefully controlled conditions before being supplied only through approved applicators.

... MORE ...

Totally recyclable, it can be applied to aluminium and galvanised steel window frames, cladding panels, curtain walling, roofing and most architectural metalwork.

All Valspar powder coatings are fully weather resistant, prevent UV fade and offer thermal shock resistance.

The full range complies with BS EN 12206-1 and AAMA 2604.2, and is certified to Qualicoat Class 2 and GSB standards.
